

Overhaul Capability

Rolaar are proud to be able to support the vast majority of customer requirements for **Industrial Gas Turbines**, both in the UK and overseas. We have access to the original specification and manuals, and every job we undertake is performed in accordance with OEM guidelines. Combined with nearly 3 decades of experience, your gas turbine and its components couldn't be in better hands.

Rolaar has an extensive library of advanced repair schemes, material and coating specifications to manage service, overhaul, repair, modification and test of electrical, mechanical and pneumatic components and assemblies.

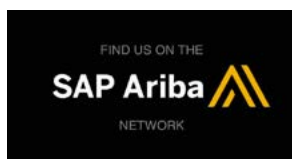

All work is undertaken in accordance with the O.E.M manual, repair schemes and modification requirements. Many of the parts we overhaul we can also supply new.

1. Inspect & Report, send the part to us so that we can carry out an inspection and report all defects back to you (There will be a charge for this service)
2. Full report, price & lead time quotation (price includes the overhaul, test and repair)
3. Acceptance & procedure - On receipt of your purchase order, report charges will be included in the overall cost
